SPEEDREADING COACH

A K-tel™ product for Apple II™ computer systems

Now you can have your own private Coach at home! Speedreading Coach comes with a visual program for your TV or color monitor with audio instruction complete with music. Your Coach takes you through several learning options — vocabulary building, over 40 timed general interest reading selections, comprehension test, and flash practice to train the eye to read groups of words. Choose your own book or article and use the computer aided reading menu. Check your progress! The Coach recaps your words per minute score in both numeric and graph form. Excellent program whether you read for business or leisure. In just a few hours Coach can train you to read with greater speed and comprehension.

- Insert diskette into the disk drive following the instructions in your computer manual. The program will load automatically and be ready to begin when the title page appears on the screen.
- Insert the audio cassette in an audio player, press PLAY. The cassette is an introduction and doesn't play in synchrony with the software program.
- Follow the prompts on the screen. Speedreading Coach is specially designed to be complete without reading an extensive instruction booklet. Just follow the prompts on the screen to advance through the program. Speedreading Coach is an excellent program to improve your reading skills.
- Timed Reading begins with a vocabulary drill to increase your word useage and comprehension. A test follows the timed reading section to help you evaluate your reading comprehension.
- Flash Card Practice allows you to test and increase your reading speed. Choose whether you want to read text or read flash cards, then choose the number of words to be grouped in a series. Increase the number of words per minute until you find the most challenging combination of phrase length and reading speed geared to your skills.
- Use Speedreading Coach to find out your current reading level and challenge yourself to improve your reading skills. Watch your progress. Coach recaps your word per minute and comprehension scores in numeric and graph form.
